### PROFILE

Skilled in HTML, CSS, JavaScript, React.js, and Git/GitHub, I specialize in crafting captivating and responsive web designs. With a strong foundation in front-end development, I focus on creating user-friendly, high-performance interfaces that enhance user experience. My expertise includes building interactive web applications, optimizing performance, and ensuring cross-browser compatibility. Passionate about modern web technologies, I continuously strive to improve design aesthetics and functionality.

### WORK EXPERIENCE

- **Internship at Webcom Systems, Mohali** - PRESENT  
Everest Remit - Remittance ([link](#))
  - Developed a responsive and visually appealing landing page for a Remittance platform using HTML, CSS, Bootstrap and JavaScript.
  - Key components include interactive navigation, and informative sections on Hero, How It Works, and About us
- **AIO Exchange - Trading** ([link](#))
  - Crafted a responsive and aesthetically pleasing landing page for a Trading service, utilizing CSS.
  - Incorporated interactive components such as an animated hero section, Security section and a prominent footer to drive user engagement.
- **Hotsport - Fantasy cricket** ([link](#))
  - Designed and built a fully responsive fantasy cricket platform using HTML, CSS, Bootstrap, and JavaScript to provide an engaging user experience.
  - Ensured cross-browser compatibility, mobile responsiveness, and fast load times while following best practices in UI/UX design.
- **JustStake - Remittance Dashboard** ([link](#))
  - Created an intuitive and responsive dashboard using HTML, CSS, JavaScript, and Bootstrap to streamline remittance management.
  - Ensured a smooth and user-friendly interface with optimized load times, responsive design, and cross-browser compatibility.
